

# Stage 1: User enters a passage of text

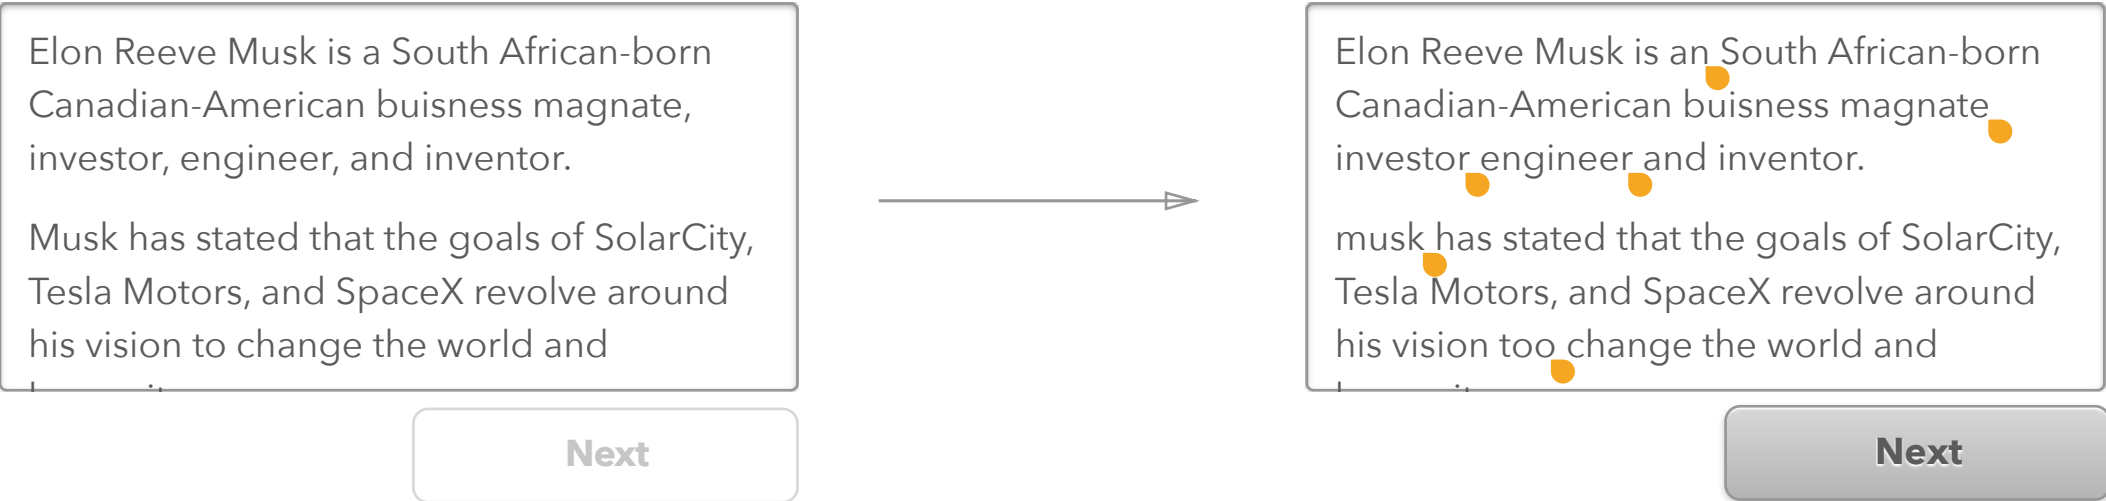

User writes a grammatically correct passage of text, hitting next when they are finished.

# Stage 2: User adds errors to the passage of text

User adds grammatical errors to the passage of text, hitting next when they are finished.

Icons are only present to show the edits in this mockup, does not need to be part of the functionality of the app.

# Stage 3: User assigns concepts to the edits

The program detects the changes between the initial text and edited text.

User assigns grammatical concepts to the errors.

Grammatical concepts to select from are "Articles, Commas, Proper Nouns".
